Dublin High Safe Routes to School Improvement Plan

Site Assessment Conducted January 16, 2013

City Improvements

Village Parkway
- Review and update School Zone signage within the school zone (subject to change per the City of Dublin signage plan).

Village Pkwy Sidewalk, south of Brighton Dr
- Work with Zone 7 to address landscape encroachments along flood control channel to increase usable pedestrian sidewalk space; consider hedge removal in advance of Brighton Ave to improve pedestrian access and visibility.
- Consider replacing hedges with plants that will not encroach on the sidewalk.
- Consider widening sidewalks between Brighton Drive and Tamarak Drive.

Village Parkway at Brighton Drive
- Consider providing high-visibility crosswalks on all legs of intersection by replacing existing yellow transverse crosswalks.
- Consider shortening the crossing distance at the southwest and northwest corners of the intersection, extending into Brighton Drive. This may be accomplished by installing bulbouts.
- Consider reducing curb radii in southeast corner.

Village Parkway, alongside Dublin High
- Review and update bicycle signage along Village Parkway to meet current MUTCD-CA standards.
- Consider providing physically separated bike lanes to reduce conflicts with passenger loading zone vehicles.

Staff/Visitor Parking Lot
- Facilitate loading/unloading in parking lot to reduce queuing on Village Parkway; methods could include parent & student education and informal enforcement.

School District (DUSD) Improvements

Staff/Visitor Parking Lot
- Replace existing racks with U-racks or similar design.
- Move eastern bike parking to more visible location.

Brighton Drive at Callan Street
- Consider recruiting and training volunteers to "platoon" crossing pedestrians during pick-up/drop-off.

Student Parking Lot, Eastern Access
- Consider improvements in the student parking lot in order to provide dedicated pedestrian access.

Joint Cooperation Improvements

Improved Iron Horse Trail Access (Long Term)
- Work jointly with Parks & Community Department on Union Pacific ROW acquisition, linear park concept & extra access points.
- Work jointly with DUSD and Zone 7 to improve existing access point to Iron Horse Trail & consider an additional access route along the easement south of the football field.
