Safety at Intersections Information

Directions: Read the safety tips below and then write, draw, or highlight a safety tip that you will practice this week.

Crossing at a Crosswalk

Crosswalks are the safest places to cross because drivers expect pedestrians to cross there. Cars don't always stop at crosswalks, so it is your job to be sure it is safe to cross.

- Always look left, right, left before crossing.
- Make eye contact with drivers if you can.
- Use your hand to signal a car to “stop” if it is appropriate.

Directions: Write, highlight, or draw a safety tip that you will practice this week.

Hidden Driveways

Hidden driveways are driveways that are hard to see due to an obstacle such as a bush or fence. They can be dangerous because often times cars backing out have a limited view.

- Always stop when you get to a driveway.
- Always look left, right, left, before crossing the driveway.
- Listen carefully for sounds that might tell you a car is coming such as engines, doors closing, etc.

Directions: Write, highlight, or draw a safety tip that you will practice this week.

4-Way Intersections

4-way intersections are different than crossing from the middle of a block.

- Always look left-right-left.
- Look over your shoulder in the direction where cars might be coming.

- Some 4-way intersections will have stop signs and some will have stop lights, but as a pedestrian, you still need to look all around before crossing.

Directions: Write, highlight, or draw a safety tip that you will practice this week.
